# Delay Herbal Gel For Men

**EX-TEN** is high quality, and made in Jordan for DIMASCompany

# Medical Background

#### Premature ejaculation (PE)

**Definition:** Is uncontrolled ejaculation either before or shortly after sexual penetration. It happens with minimal sexual stimulation and before the person wishes.

- ✓ It may result in unsatisfactory sex for both partners.
- This can increase the anxiety that may add to the problem.
- ✓ It is one of the most common forms of male sexual dysfunction.
- ✓ It has probably affected every man at some point in his life.
- To overcome this problem the orgasm has to be delayed

### FEATURES of Premature Ejaculation

1 out of 3 men experiences PE at some time in their lives.

There are 2 different types of Premature Ejaculation:

**Primary PE** is the most common & is present from the beginning of a man's sexual life.

**Secondary PE** develops without warning, at some point during a man's life.

#### 1.8 minutes -

The average amount of time a man suffering from premature ejaculation lasts, after sexual stimulation begins.

#### Consequences of Quick Ejaculation

- Psychological effects: Both partners tends to be dissatisfied physically and emotionally as a result of this problem. This may further result into problem within the relationship
- Difficulty in impregnating: Especially in severe cases where ejaculation occurs before the onset of sexual activity. Conception may not be possible except if assisted fertility such as artificial insemination is used.

## Causes of Early Ejaculation

#### Causes of Early Ejaculation

- ► The exact cause for premature ejaculation is unclear. However, studies have shown that premature ejaculation causes ranges from :
  - \*Psychological
  - \*Biological

### Psychological causes

- Performance pressure such as fear to satisfy the partner
- Deep anxiety about sex that relates to traumatic experiences during development (eg, incest, sexual assault etc.)
- Interpersonal issues with current partner
- Teen masturbation practices to ejaculate fast so as not to be caught
- Erectile Dysfunction and fear that erection will not last might lead to premature ejaculation
- Feelings of guilt which increase your tendency to rush through sexual encounter
- Depression

#### **Biological Causes**

- Inherited traits
- Abnormal hormonal levels: A 2009 study by corona et al concluded that low prolactin level might be associated with erectile dysfunction, premature ejaculation, metabolic syndrome and anxiety. This study also concluded that high testosterone level facilitates ejaculatory reflex
- Another study suggested that dysfunction of the prostate and epididymis may contribute to premature ejaculation
- Certain thyroid problems
- Effects of drugs/medications: Hyper excitability might be related with the use psychotropic drugs

# Factors that Increase the Risk of Premature Ejaculation

- Stress: Both emotional and mental stress can increase the chance of early ejaculation by making it difficult to relax and focus during sexual encounters
- Health Issues: Chronic health issues such as heart disease, diabetes, etc. may case anxious feeling during sex making you to ejaculate on time
- ▶ **Erectile Dysfunction**: Men with trouble in getting and maintaining erection may hurry through sexual encounters because of the fear of losing erection.
